PRODUCTS:

Airport Seating Alliance supplies only high quality seating. Our varied lines consists of different styles in perforated steel, extruded or sheet aluminum, contour molded wood, injection molded and roto-cast polypropylene for indoor and outdoor seating.

We have an wide selection of fabrics and vinyl's that meet all international commercial safety standards.

Some of our models offer polyurethane molded cushions designed to withstand extreme use where passenger traffic is very high. In addition to seating, we cooperate with other companies that supply airport interior products such as carpeting, waste receptacles, planters, check-in counters, stanchions and children's play modules. All of our products are unique in design, function and provide user comfort while being easy to maintain. We also have innovative custom seating solutions for both the international and domestic traveler.

Power & Go Tower:

The new Power & Go Tower will meet the travelers' need for power and communications on a free standing computer work station perfect for recharging computers and cell phones, which can be useful for changing and making reservations. The Power & Go Tower benefits the airport by generating revenue from advertisements.
